DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimomura in view of Tanaka et al. The primary reference discloses in col. 7, line 44 to col. 8, line 25, col. 9, line 45 to col. 10 line 35 and the abstract a process of making a magnetic recording medium comprising applying a non-magnetic layer on to a substrate with a knife coater in which the non-magnetic layer comprises a binder, carbon particles and a lubricant and drying. Applying a magnetic coating on to the dried non-magnetic layer in which the magnetic layer comprises a binder and magnetic particles. The primary reference fails in anticipation of these claims in that it does not disclose the use of a die nozzle followed by scraping the excess coating material from the backing. The Tanaka et al reference discloses in the figures and col. 5, lines 1-20 a method of making a magnetic recording medium comprising applying a magnetic coating on to a backing with a die nozzle and determining the final coating thickness by scraping with a bar. It is the examiner's opinion that it would have been obvious for one having ordinary skill in this art at the time the invention was made to substitute the coating means of the secondary reference for the coating means of the primary reference since structural limitations in a process claim are immaterial from a patentable viewpoint. The

limitations of the dependent claims are conventional and do not render these claims unobvious.
